2022 water data will be published in our CDP Water Response in the late summer of 2023. In 2022:
(1) Total water withdrawn: 3,950,158 cubic meters;
(2) Water Consumption (On-site in Process or Product): 1,806,818 cubic meters; 1.00 cubic meters per metric ton of production; percentage of water sourced from regions with High or Extremely High Baseline Water Stress: 20.77%.

**Number of incidents of non-compliance associated with water quality permits, standards and regulations**

- **Category:** Quantitative
- **Unit of Measure:** Number

The Company has thousands of locations globally and, like other multi-national corporations, experiences occasional allegations of non-compliance with water discharge regulations and permits. In those cases, the Company works with applicable authorities to resolve any allegations of non-compliance to the mutual satisfaction of the parties. We had two (2) documented incidents of non-compliance associated with water quality permits, standards and regulations initiated in 2022. These issues were addressed and corrected with the agency.

### Hazardous Waste Management

**Amount of hazardous waste generated, percentage recycled**

- **Category:** Quantitative
- **Unit of Measure:** Metric tons (t), Percentage (%)
- **Codified Metric Code:** RT-CH-150a.1

We generated 65,100 metric tons of hazardous waste in 2022. Of that, 38.7% was recycled or reused. For further information, please see pages 22-23 of our 2022 Sustainability Report.
